Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson ('098) in view of Morrison et al. ('554). Robinson teaches an element comprising eight wooden elements (Figure 1) that have top and bottom surfaces, each of the elements also include a concealed flap, first and second portions, a middle portion, and an exposed flap, wherein the concealed flap is adjacent the first raised portion, the exposed flap is adjacent the second raised portion and the middle is between the first and second raised portion such that the concealed flap, the middle portion, and the exposed flap are positioned in substantially the same plane. The flaps and portions of the eight wooden elements are positioned as stated in the claim (as seen in Figure 1). Robinson teaches an element as stated above, but does not specify that the wood is plywood. Morrison shows that it is known in the art that strips of plywood are bendable (column 10, lines 33-34). It would have been obvious to one having ordinary skill in the art at the time the invention

was made to utilize plywood as a material when forming a wooden strip, since this material is known to have the ability to be bent or curved.
